- › 08C: Coiling Doors
- › 09A: Framing and Drywall
- › 09D: Painting and Wall Coverings
- › 11A: Building Maintenance Equipment
- › 14A: Elevators

Project description:

A new 400,000 SF, 225-bed state-of-the-art teaching hospital serving as a Level I Trauma Center. This advanced, modern facility will replace the existing hospital, which will remain fully operational throughout construction to support uninterrupted patient care. The project will deliver a comprehensive academic medical center designed to support cutting-edge clinical care, medical education, and research, establishing a new standard for healthcare infrastructure in the region.
