- | | | |
|------------------|------------------|-------------------|
| › Earthwork | › Asphalt paving | › Septic fields |
| › Site utilities | › Site concrete | › Water treatment |
| › Geothermal | › Landscaping | › Well drilling |

Project Description:

Gilbane is providing Construction Manager at-Risk services for the new, a state-of-the-art recreation and aquatics facility designed to serve the growing Loudoun County community. The approximately 100,000 SF facility will include aquatics, fitness, recreation, classroom, administrative, and community gathering spaces.

The project also includes significant site development and park amenities across a 142-acre campus, featuring athletic fields, parking, utilities, roadway access, landscaping, and supporting infrastructure. Sustainable systems, including geothermal and water treatment components, are also planned as part of the project.
