
BECOME A PART OF THE **PC/CDM JOINT VENTURE TEAM**

The **PC/CDM JOINT VENTURE** is looking for vendors and subcontractors interested in working with us on our new **DC WATER Tunnel Dewatering Pump Station/Enhanced Clarification Facility Project**. Construction activities will soon be underway, and we are always searching for companies that can help us meet our Fair Share goals!

ABOUT THE PROJECT

The design and construction includes, but is not limited to, build-out of the Tunnel Dewatering Pump Station (TDPS) and Enhanced Clarification Facility (ECF). The TDPS work includes construction of a multi-story 165 foot deep pump station housing the main tunnel dewatering pumps and other supporting mechanical and electrical equipment, and instrumentation and control systems. The ECF includes a process treatment system, together with mechanical, electrical and instrumentation control equipment. New electrical service and piping connections to the existing Blue Plains Plant treatment systems, chlorination and dechlorination system, and rehabilitation of outfall piping to the Potomac River may also be included.

PC/CDM JOINT VENTURE

The Tunnel Dewatering Pump Station and ECF is being constructed by a joint venture of PC Construction and CDM Smith. PC Construction is one of the nation's largest employee-owned contractors, offering general contracting, construction management, and design-build services. CDM Smith is a global consulting, engineering, construction, and operations firm that is providing both design and construction management services for this specific project. Together, this team has a history of successfully completing numerous projects in the region, including the recent Main Process Train Project - DC Water Blue Plains. The joint-venture is currently providing a wide variety services to DC Water as a part of this project, including design, construction, quality control, startup, and commissioning.

FAIR SHARE GOALS

The Fair Share Objectives for Minority and Women-Owned Business Enterprise (M/WBE) involvement in this project are determined as percentages of the total TDPS/ECF contract value. Our goal is to achieve a participation of 28 percent and 4 percent, respectively, for the professional services component, and of 32 percent and 6 percent, respectively, for the construction component of the project

CURRENT OPPORTUNITIES

The PC/CDM Joint Venture is actively looking for companies that provide a wide variety of goods and services (W/MBE). If your company offers any of the services listed below, please contact us for more information on the project and for any upcoming bid opportunities:

- Office Supplies
- Blueprinting
- OSHA & First Aid
- General Construction Materials & Tools
- Equipment Rental
- Precast Structures
- Structural Steel
- Miscellaneous Steel Fabrications
- Membrane Waterproofing
- Rigid Insulation
- Sprayed-on Insulation
- Fireproofing
- Preformed Metal Siding
- Roof Accessories
- Sealants
- Doors and Frames
- Overhead Doors
- Finish Hardware
- Acoustical Wall Treatment
- Special Coatings
- Sprayed Fireproofing
- Painting
- Identifying Devices
- Process Equipment
- Fiberglass Reinforced Piping
- Monorail Systems
- Hoist Equipment
- Process Piping
- Mechanical Insulation
- HVAC
- Fire Protection
- Plumbing
- Certified Welders
- Heavy Concrete Construction
- Utility Pipe (Storm Sewers, Water, etc.)
- Process Mechanical Piping
- Masonry

Event Date: August 18, 2014

Time: 1 to 4 PM

Location: DC Water Visitor Center -5000 Overlook Avenue, Washington, DC 20032 . PLEASE BE SURE TO RSVP TO BEVERLY BROWN BY FRIDAY

08/15/2014 Visit our website at: <http://cdmsmith.com>
