

Brendan Works, LLC Fabricates Raw Steel into Finished Products

Since 2009 Brendan Works, LLC, a certified minority-owned business in structural steel, miscellaneous metals and precast concrete has completed many jobs, including [commercial](#) and [residential](#). Owner, Daniel Smith learned the trade as a journeyman and like most ambitious American workers decided he could do more for his community by opening his business, hire and train local talent to improve America. “As a young man, I enjoyed creating objects out of metals and steel and I knew one day that I would be giving back to the community that assisted me so much. I am proud to employ individuals with the same values, work ethics, safety and consciousness. At Brendan Works we love to fabricate raw steel into a finished product,” said Mr. Smith.

“Brendan Works, LLC is a unique boutique steel fabricating shop located just outside of Washington, DC and Daniel Smith is the type of American business owner willing to take risk to create wealth not only for his family but all who work for him. I see nothing but pride beaming from him and I implore prime contractors to seek pricing from him,” said Wayne R. Frazier, Sr., president of Md. Washington Minority Companies Association (MWMCA)
