

Stocks Management Group Specializes in All Wet and Dry Underground Utilities, Earth and Site Work

With President Biden's infrastructure bill being debated in Congress currently, America and the DMV wait patiently for Congress's approval. Once an amount can be agreed upon, bridge, highway, water, gas, and electrical underground utility contractors, will be in heavy demand to seize upon the vast array of new opportunities. Here in the DMV, it will be lights out to locate the best disadvantaged business enterprises (DBE's) to fulfill the inclusionary requirements set by law. However, before the various federally funded backed projects start to take off, there's a well experienced trade known as Stocks Management Group, and owned by David Stocks, Jr., who is equipped and ready to go now!

"Stocks Management Group specializes in all wet and dry underground utilities, earth and site work. They cover the entire DMV with an excellent to-date safety record and experience. Owner David Stocks started in the masonry field as a young contractor assisting his father in the masonry trade. He went on to serve in the US Army and earned an Associate Degree in Business Management from Ashworth College. Prior to forming his business, he served in project management roles for several prime contractors. David has prepared himself with education, training and real-life on-the-job experiences as well. He understands his strengths and builds where needed. Stocks Management Group is well capitalized, experienced and ready to quote one's next project", said Wayne R. Frazier, Sr., president of Md. Washington Minority Companies Association (MWMCA).
