.....

Howard University's Real Estate Development & Capital Asset Management (REDCAM) division is excited to join the Live! Casino & Hotel and Md. Washington Minority Contractors Association's Minority Outreach Fair!

As an event participant, with over \$1 billion in contracting opportunities in the near term, Howard will seize this opportunity to launch its **Howard Builds** initiative, aimed to identify contractors, vendors and trades of all sizes and assess their capabilities in upcoming projects. In partnership with the DC Small Business Development Center (SBDC) and JSSB Consulting LLC, the REDCAM team will provide technical assistance to contractors as they bid, win and execute work to grow capacity and profitability.

Strategic partnering opportunities include: Campus Facilities, Capital Projects, Commercial Development, Healthcare and Student Housing.

Since its chartering in 1867, Howard University has pursued the goal of eliminating disparities stemming from racial, social, and economic inequities. Nearly 160 years later, Howard's REDCAM team upholds this legacy – ensuring qualified contractors participate in University development projects. Their commitment rests with building Howard and its neighboring communities. Come meet with REDCAM leadership and learn how you can benefit from these opportunities, while adding to Howard's local and national impact.
