

## DC Water Plantwide Stormwater Drainage Improvements

Bid Date: 7/11/18 & 2:00 PM

### Project Description:

This project consists of furnishing all labor, services, materials, tools, insurance and equipment necessary for the removal of existing equipment and material, cleaning, rebuilding and installation of existing equipment, installation of new equipment and material, proper performance and completion of the Plant-Wide Stormwater Drainage Improvements at the Blue Plains Advanced WWTP.

#### Part 1 Includes:

- Milling of existing roadway and parking areas
- Removal of drainage structures and plugging/abandoning existing drainage structures and pipes
- Providing full depth asphalt and overlay of roads and parking areas
- Installation of drainage structures and storm sewer pipes.
- Construction of two cast-in-place concrete pump stations.
- Installation of submersible pumps, valves and pump discharge force mains
- Electrical power supply to new pump stations
- Installation of instrumentation and control systems for new pump stations.

#### Part 2 Includes:

- Milling and overlay of existing roadway
- Removal of drainage structures, and plugging/abandoning existing drainage structures and pipes
- Providing full depth asphalt and overlay of roads
- Installation of drainage structures and pipes.

### Divisions of work include:

Division 2- Earthwork, Paving, Landscaping, Trucking, Waste Collection, Equipment

Division 3- Cast-in-Place Concrete, Precast Concrete
