_____ YES, we will bid. _____ NO, we are unable to bid.

We hope that you will join us in bidding this project. If you would like to become a subcontractor with CAM and receive future ITB's please go to the website noted below and complete a Subcontractor Qualification Application. The application will be used by CAM to aid in determining your qualifications to perform the work being bid. www.clarkextranet.com/subform.

**BID INVITATION FOR CONSTRUCTION OF
Alexandria Renew Enterprises RiverRenew Tunnel System
Project Contract No. 19-09**

Your bid is due to us on or before
September 9th, 2020 @ 5:00PM (EST)

Project Description:

RiverRenew is the largest infrastructure initiative in the history of Alexandria, addressing a 2017 Virginia law to achieve healthier waterways by July 1, 2025. The Work generally consist of the construction of 4 deep shafts, a waterfront tunnel approximately 2 miles long, a near surface interceptor along Hooff's Run, and a tunnel dewatering and wet weather pumping station. The tunnel system will capture millions of gallons of combined sewage from four outfalls for transport to the Tunnel Dewatering and Wet Weather Pumping Station at AlexRenew, where it will be treated and cleaned prior to returning to the Potomac River. The project's objective is to separate the existing combined water & sewage system which sends sewer overflow into the Potomac River polluting it during heavy rainfall.

The major elements of the project include tunneling, earthwork, concrete, trucking, miscellaneous metals, asphalt and concrete paving, striping, landscaping and wetland restoration, as well as numerous finish trades within the Tunnel Dewatering and Wet Weather Pumping Station.

Please contact the following estimators for questions related to your trade:

Todd McQuinn - (301) 272-8344, Todd.Mcquinn@clarkconstruction.com – Chief Estimator (Clark Civil)

Jon Aceto – (802) 318-7960, Jonathan.Aceto@clarkfoundationsllc.com – Chief Estimator (Clark Water), Agtek, Post-Tensioned Concrete, Hooff's Run SOE, Storm Drains, Bypass Pumping, Division 40, Cranes, Hoists & Winches, and Process Mechanical
