

**REQUEST FOR INTEREST
FOR CONSTRUCTION OF
City of Richmond
Canoe Run Park Storage Tank CSO Final Plan Project
Richmond, Virginia
Your expression of interest is due to Clark on or before
October 10, 2025, by 5:00 PM (EDT)**

Clark Water is seeking interested MBE and ESB trade partners for the Canoe Run Park Storage Tank CSO Final Plan Design-Build project.

Project Description:

This design-build project involves the construction of a new CSO storage tank and diversion structure. We are looking for experienced partners to assist with key elements of the work.

Project Scope Elements:

The Work includes, but is not limited to, the following:

The scope of work for this design-build project includes all necessary services for the design and construction of a new CSO storage tank and diversion structure. The final technical details will be finalized in the awarded Design-Build contract. Key responsibilities include:

Site Preparation & Excavation

- Excavation support systems and groundwater control
- Handling and disposing of excavated material
- Installation of geotechnical instrumentation and monitoring
- Rock removal/ excavation

Structural & Utilities

- Sewer installation by open-cut methods
- Electrical, instrumentation, and plumbing
- Rebar installation, formwork, and structural concrete placement
- Process mechanical systems

Site Management & Logistics

- Maintenance of sewer flows
- Stormwater management and erosion and sediment control
- Site restoration and landscaping
- Managing quality of life issues and noise reduction
- Traffic Maintenance

Project Controls & Operations

- Protection of structures and pre-and-post construction inspections
- Commissioning and start-up
- Comprehensive safety program
- Quality control program
- Permitting

Trade Opportunities:

Clark is currently submitting on the request for qualification package for the project. We are seeking interested firms for the scopes mentioned along with professional design services.

Expressions of Interest should be sent to:
