

Company Overview

History

Founded in 1949 by the Cianchette brothers, Cianbro Corporation is one of the most diverse and successful open shop contractors in the United States. As a 100% employee-owned company, Cianbro employs 4,000 team members with project experience in forty states.

A total commitment to safety combined with the enthusiasm of an innovative team of construction professionals has earned Cianbro a reputation for completing complex projects safely, on schedule and within budget.

Geography

Cianbro has established a service territory which spans the entire United States. With the Corporate Office located in Maine, Cianbro also has offices in the North East, Mid Atlantic, Mid West, South Central, and South West Regions, in addition to Fabrication and Coating, Deep Water Marine, and Modular Manufacturing Facilities.

Open Shop

As an open shop/merit shop contractor, Cianbro is not signatory to national or local labor agreements. Teamwork, dedication, and personal sacrifice are what differentiate Cianbro from its competitors. Cianbro team members apply a can-do spirit in the workplace every day, implementing innovative and creative solutions for client needs on a wide variety of projects.

Employee Owned

Cianbro is 100% employee owned by team member participation in the Profit Sharing Plan, facilitated by the Employee Stock Ownership Plan (ESOP). Each team member shares in the risk and profits of business. As owners, team members work more safely, efficiently, and productively to ensure the successful completion of each project.

Construction Services

Cianbro provides Construction and Construction Management Services from the conceptual design through project implementation, start-up, and commissioning. Using a variety of contractual means and contracting roles, including complete turnkey delivery, Cianbro's objective is to deliver each project safely, on schedule and within budget. Cianbro craft persons self perform Civil, Structural, Mechanical, Electrical and Instrumentation trades in twelve business lines including:

- Industrial
- Electrical Transmission & Distribution
- Fuel Transmission & Distribution
- Power Generation & Energy
- Hydro & Dam
- Refining & Petrochemical
- Transportation
- Marine Structures & Vessels
- Water & Waste Water
- Commercial & Institutional
- Modular Manufacturing
- Fabrication & Coating

Construction Services

Cianbro offers construction services from the conceptual stages of design through implementation, to start-up, commissioning, and turn-key operations. Cianbro's versatility can be attributed to a vast service territory throughout the United States, effectively demonstrated by the diverse nature of completed projects. Cianbro's success can be credited directly to the team's attitude towards working safely, with enthusiasm, and a genuine concern for clients. Skill and experience possessed by Cianbro's team members cover the complete spectrum of construction trades.

Construction Services

- Transmission & Distribution
- Substation Construction
- Transformer Retrofill
- Deep Foundations
- Electrical
- Underground Installation
- Start-up & Testing Services
- Instrumentation & Control Work
- Concrete & Grouting
- Cable Splicing
- Pipe Welding
- Code Piping
- Welding
- Tower Installations
- High Purity Piping
- Structural Steel
- Lighting

Fabrication Services

- Bridge Steel Materials
- Construction Materials
- Structural Steel
- Beam & Column
- Duct Work
- Fire Proofing
- Fleet & Equipment Coatings

- Piling
- Carpentry
- Power Line Construction
- Process Equipment Installation
- Process Piping
- Rigging
- Site & Earthwork
- Boiler Installation/Repairs
- Interior Finishes
- Dewatering
- Drilled Piers
- Tank Erection
- Gas Pipelines
- Transformer Painting
- Miscellaneous Metals
- Caissons
- Demolition

- Industrial Coatings
- Injection Resins
- Miscellaneous Metals
- Plate Work
- Polymer Coatings
- Temporary Steel
- Specialty Coatings

Services Performed/Subcontracted

Self-Perform / Subcontract

This list reflects what is typically self-performed and typically subcontracted. In some cases, Cianbro is capable of self-performing work depicted as subcontracted and similarly the inverse is true. Decisions to self-perform or subcontract can be predicated by cost, schedule, resource availability, project complexity and/or critical path preferences.

Civil

Batch Plant Operation
Blasting
Buildings
Caissons
Compressor Stations
Demolition
Dewatering
Directional Drilling
Drilled Piers
Excavation
Fencing
Fireproofing
Foundations
Grouting
Paving (Asphalt)
Piling
Roads
