# CAPABILITY STATEMENT

## Company Information

Founded in 2010, Ease Painting & Construction Inc. (EASE) is an elite Steel Society for Protective Coating (SSPC) QP-1 painting contractor certified to provide field applications of coatings to complex structures. EASE self performs industrial, commercial and marine surface preparation and the application of high-performance protective coatings, industrial cleaning, environmental remediation, and other general construction services. EASE has successfully completed over one hundred and seventy-five projects ranging in size and complexity for various City, State, Municipal, Federal, and Commercial clients. EASE takes pride in being an industry leader and ensure we leave behind a legacy of commitment and goal achievement for all projects we are a part of.

**TIN:** 20-0467409

**DUNS:** 603007621

**CAGE Code:** 46UL8

**Bonding:** \$5M/\$10M

**Years in Business:** 13+ Years

**SBA Concerns:** WOSB, HUBZone, SB

**Painting:** EASE safely completes each contract on time, on budget, and according to the specifications. Our SSPC QP-1 certified painting crews are among the best trained and most experienced in the nation, regardless of the preservation services specified. We are certified and capable of applying extremely specialized and specifically engineered high performance coatings in commercial, industrial and marine applications, safely and successfully complete painting projects regardless the level of complexity or size. Our nationwide services include cleaning services, surface preparation and the painting of any industrial building, structure, ship, or warehouse.

**NAICS Codes:**

**238320** Painting & Wall Coverings (Primary)

**336611** Ship Building & Repair

**562910** Remediation Services

**236220** Commercial & Inst. Construction

**238990** All Other Specialty Trade Contractors

**Industrial Cleaning:** EASE has the personnel, experience and equipment to handle the toughest industrial cleaning tasks. Our list of industrial cleaning services include: Wet and dry vacuuming, vacuum sweeping, water blasting, paint system cleaning, and industrial marine cleaning

**237110** Water & Sewer Line Construction

**Surface Preparation:** Our surface preparation is based on the subsequent coating required by our clients. We offer versatile abrasive blasting services and provide a range of surface preparation methods including: Ultra-high water jetting up to 40,000 psi, abrasive sponge and grit, glass bead, bicarbonate of soda, and carbon dioxide. We utilize media such as glass bead, steel grit, garnet, aluminum oxide, plastic, walnut, and corn cob.

**Environmental Remediation:** EASE can provide the full scope of services to support any lead removal project, including abatement, encapsulation, containment, removal, and disposal.
